CAREBRIDGE · CHALLENGE 6 · SAT 10 OCT, 09:00

Our pitch on one page

4:20, start to finish
Pitch, live demo, poster.
No slides, no Q&A.

The feeling we want: the judges hear Mary and can't understand her, just like the nurse. A minute later, CareBridge understands her out loud, in front of them. The rest shows why it can be trusted, why it matters, and how it follows Mary beyond the emergency.

Running order

TIME	SECTION	WHO	POSTER	LIVE DEMO
0:00	1 · The hook 2 · The problem: Mary's emergency	**Bakht**	1, 2	Plays Mary's voice and asks the judges which language it was.
0:55	3 · The solution: Emergency Mode	**Chijindu Okafor**	3	One tap. Mary's voice plays again; the phone says it in English. The reply is spoken in Ukrainian.
2:00	4 · Trust and security 5 · Why it matters	**Eriitunu Adesioye**	4, 5	Laptop: that same conversation, already saved.
2:55	6 · Beyond the emergency 7 · The close	**Mohd**	6	Consultation Mode: a dose is highlighted, confirmed, then read out on Mary's iPad.
4:20	**End.** "Thank you." Step back together.			

Who holds what

PERSON	DEVICE	READY AT 08:55
Bakht	Own phone, then the iPad	Phone: Safari on Mary's voice (link on page 6), volume at maximum. iPad: Mary's screen in Mohd's consultation.
Chijindu Okafor	Own phone	CareBridge home screen, signed in as "Chijindu Okafor". Microphone already allowed.
Eriitunu Adesioye	Laptop	CareBridge home screen, signed in.
Mohd	Own phone	Standard Consultation running in Українська (we call it "Consultation Mode" in the pitch).

Six rules

It's a pitch
Energy, not detail. Short sentences. Look at the judges, not at your page.

Point at the poster
Touch the page number as you say it. The poster is our only visual.

Silence while it listens
While Emergency Mode is on, nobody else talks. It translates whatever it hears.

One retry, then move on
Never fix things in front of the judges. Use the backup line on your page.

Hand over by name
End on the next person's name: Bakht → Chijindu Okafor → Eriitunu Adesioye → Mohd.

Grey ✂ lines are cuttable
If a rehearsal runs over 4:20, cut these first. Never cut a demo or the last line.

Timekeeper: Bakht, once the opening section is done. One raised finger at 4:00 means "Mohd, go to the close".

1 · THE HOOK · 2 · THE PROBLEM

Bakht Zia Khan

0:00 – 0:55
Poster 1 2
In hand: your phone, Mary's voice ready

DO Step forward. Look at the judges. Wait two seconds before you speak.

1 · THE HOOK · 15 SECONDS

> 1 "Asking for help is the most basic thing a person in need can do. [PAUSE] But what happens when **nobody understands you?**"

2 · THE PROBLEM · 40 SECONDS

> "2 Meet **Mary**. She's visiting her daughter in Dublin. This morning, her chest starts to hurt, so she comes to Tallaght. She's in pain, she's scared, and she doesn't speak English. This is what she says to the nurse:"

DO Hold your phone up towards the judges and play Mary's voice (6 seconds). Let it finish.

> "**Which language was that?**" [PAUSE. LET THEM GUESS.]
> "Russian? Polish? Ukrainian? The nurse doesn't know either, and her translation app wants her to pick one. Nobody is sure. Minutes pass. And in an emergency, **minutes matter**."

> "Mary is not the problem. **The system is.** [TURN] Chijindu Okafor."

WAIT Stay next to Chijindu Okafor with Mary's voice ready. **On the nod, play it again**, about 30 cm from the phone. Then pick up the iPad for Mohd's demo, and keep time: one raised finger at 4:00.

DELIVERY

Say the hook slowly and calmly; it's the first thing the judges hear. "Which language was that?" is a real question: wait for a judge to answer or shrug. That moment is the whole pitch.

IF MARY'S VOICE WON'T PLAY

Read the Ukrainian line on poster page 1 out loud, slowly, then ask "Which language was that?" It has the same effect.

3 · THE SOLUTION: EMERGENCY MODE

Chijindu Okafor

0:55 – 2:00

Poster 3

In hand: your phone, CareBridge home screen

> "3 This is **CareBridge**. [HOLD UP YOUR PHONE]
> In an emergency, there's no time for menus. So: **one tap**."

DO Tap **Emergency · START NOW**. Hold the phone up facing the judges. **Nod to Bakht**, who plays Mary's voice again near your phone. Nobody speaks.

WAIT About 8 seconds. The phone says out loud: **"Help me, please. My chest hurts a lot. I'm allergic to penicillin."**

DO Straight away, without explaining, lean in and say clearly: **"You are safe. We will not give you penicillin."**

WAIT The phone says it out loud in Ukrainian. **Then tap Pause.** Only start talking again after that: while it's listening, it translates everything you say.

> "It didn't ask us anything. It knew she speaks **Ukrainian, not Russian**, and caught a **penicillin allergy** nobody knew about. Put it on the table, and it just works.
>
> [PAUSE]
>
> For the first time since she walked in, **Mary can say what's wrong.** [TURN]
> Eriitunu Adesioye."

DELIVERY

Let the phone do the talking. From START NOW until you tap Pause, say only the one line to the phone. Watch the judges' faces, not the screen. Your last line is the emotional peak, so say it slowly.

IF IT DOESN'T HEAR MARY

Nod for one more play, closer to the phone. If it still misses: "In a real emergency this is one tap. Let me keep us on time." Tap Pause and hand over to Eriitunu Adesioye.

About 60 words plus two live turns (about 35 seconds of demo). Hard stop 2:00.

Eriitunu Adesioye

2:00 – 2:55

Poster 4 5

In hand: laptop on the CareBridge home screen

4 · TRUST AND SECURITY · 30 SECONDS

> "4 But a hospital can't just trust a translation. So before anyone hears it, CareBridge checks **every number, every 'not', every medicine**. We planted twenty-eight dangerous errors into real translations, and it caught **twenty-seven**."

DO Tap **Audit log**, then the top red ⚡ **Ukrainian · Chijindu Okafor** row. Turn the laptop to the judges.

> "That conversation is already saved to Mary's record, so her care team can come back to it any time. Her voice itself is **never saved**. And in the hospital it runs on AWS in Dublin, so **Mary's data stays in Ireland**."

5 · WHY IT MATTERS · 25 SECONDS

> "5 And it matters. Last year the HSE spent **eleven point three million euro** on interpreting: **five times** more than in 2020.
> Interpreters are essential. But they can't be at every bedside at **three in the morning**.
> CareBridge can: twenty-four seven, in every room, from the first second. [TURN]
> Mohd."

DELIVERY

Two big numbers: 27 out of 28, and €11.3 million. Say each one slowly and point at it on the poster. Everything else is support.

IF THE AUDIT LOG IS SLOW

Skip it: point at the saved record on poster page 4 and say the same line. Don't wait for the screen.

Mohd Wafa

2:55 – 4:20
Poster 6
In hand: your phone in Consultation Mode

6 · BEYOND THE EMERGENCY · 65 SECONDS

> "6 Mary recovers, and she comes back for check-ups. Now there's time to get every word right, so we use **Consultation Mode**. I have CareBridge on my phone, and Mary has her own screen, in Ukrainian." [BAKHT HOLDS UP THE iPAD]

DO Tap the mic, say **"Take two tablets of 500 milligram paracetamol every six hours."**, tap stop. Turn your phone to the judges.

> "Before anything reaches Mary, I see what CareBridge heard, with the **dose, the medicine and how often** highlighted. If it misheard me, I fix it. Once I've checked…"

DO Tick the checkbox, tap **Confirm & translate**.

> "…it's translated, checked again, and read out to Mary in Ukrainian." [LET THE iPAD SPEAK]
> "She can answer by voice or a tap, and it all goes on her record. And next, we're bringing CareBridge into Google Meet, so her follow-ups can come with her, wherever she is. ✂"

7 · THE CLOSE · 20 SECONDS

> "[PAUSE] Mary came in with chest pain and no words anyone understood. She leaves **heard**, with her allergy on her record.
> CareBridge doesn't replace the people who care for Mary. It makes sure **they can understand her**.
> Because everyone deserves to be able to ask for help, **and to be understood when they do.** Thank you."

WHAT CONSULTATION MODE IS (FOR YOU, NOT TO READ OUT)

Emergency Mode is hands-free: it translates both ways on its own, instantly. Consultation Mode (on screen: **Standard Consultation**) is for planned visits like check-ups, clinics and ward rounds, when there is time to get every word right.

1. **Two screens, one conversation.** The doctor uses a phone; the patient has their own screen (the iPad) in their language.
2. **The doctor speaks, then reviews.** CareBridge shows what it heard, with doses, medicines and "not" highlighted. The doctor can edit it, and must tick that the highlighted details are right.
3. **Then it goes to the patient.** It is translated, numbers and medicines are checked, and it is shown and read aloud on the patient's screen.
4. **The patient answers** by speaking, or by tapping answers, a pain scale or a body map. Everything is saved to the record.

EVERYONE · BEFORE 09:00

Setup and backups

Start at 08:00
Rehearse at 08:30.
Fresh sessions at 08:50.

08:00 · Mohd: wake the server

- [ ] AWS Academy Learner Lab → **Start Lab**. This gives a fresh 4 hours, until about 12:00. Wait for the green dot.
- [ ] On the laptop open **https://lekjx2h7ch.execute-api.us-east-1.amazonaws.com/api/health** and refresh until it shows **"ready":true** (2 to 3 minutes).
- [ ] Sign in to CareBridge on every device with the staff code, each with your own first name.

08:10 · Every device

- [ ] Charged above 80%. Volume at maximum. **iPhone silent switch OFF**, or the app will be muted.
- [ ] Do Not Disturb on. Auto-lock set to Never. All other apps closed. Everyone on the same Wi-Fi; Mohd has a hotspot ready.

08:30 · Rehearse twice with a stopwatch

- [ ] **Bakht:** open **https://lekjx2h7ch.execute-api.us-east-1.amazonaws.com/audio/mary.wav** in Safari and play it once.
- [ ] **Chijindu Okafor:** do the full Emergency demo once (allow the microphone when asked). Check the English is spoken loudly. Then go back to the home screen.
- [ ] Time the whole pitch. Over 4:20? Cut the grey ✂ lines, starting with Mohd's. Never cut a demo.

08:50 · Fresh sessions for the judges

- [ ] **Mohd:** Home → **Standard Consultation** → tap **Українська**. Open **Add a device** to see the code.
- [ ] **Bakht:** iPad → **Join a session** → enter the code → **Patient**. Tap Start and consent, as Mary would. Put the iPad where you can grab it.
- [ ] **Chijindu Okafor:** stay on the home screen. Emergency starts live, in front of the judges.
- [ ] Poster on the board: **top row 1 · 2 · 3, bottom row 4 · 5 · 6**, page 1 top left at eye level.

If something breaks

PROBLEM	WHAT TO DO, WITHOUT STOPPING
Speech is misheard	Re-record once. Then type it, or use a pre-checked phrase: "We can type it too."
No sound from a device	Point at the words on screen: "She sees it in her own language, and normally hears it too."
Site down or Wi-Fi gone	Home → **Offline phrasebook**: "We built an offline mode for exactly this." Keep pitching from the poster.
Running long	At Bakht's 4:00 finger, Mohd cuts the grey ✂ line and goes straight to the close.

Never type or show the staff code where a judge's phone or camera can see it.
